## ABSTRACT

Abstracts should be about 150 words. Required. See: <https://users.ece.cmu.edu/~koopman/essays/abstract.html>

## CCS CONCEPTS

• **Human-centered computing** → **User studies; Ubiquitous and mobile devices;**

## KEYWORDS

Authors' choice; of terms; separated; by semicolons; include commas, within terms only; required.

## ACM Reference Format:

Robin Schweigert, Simon Hagenmayer, and Jan Leusmann. 2018. Knuckle Input. In *Proceedings of Fachpraktikum Interaktive Systeme (FIS'18)*. ACM, New York, NY, USA, 2 pages.

## INTRODUCTION & RELATED WORK

The structure of the final submission is only a suggestion, feel free to change if it needed. Final a example publication under: <http://sven-mayer.com/wp-content/uploads/2017/03/le2016placement.pdf>. How to report machine learning? See: <http://sven-mayer.com/wp-content/uploads/2018/01/>

---

*FIS'18, July 2018, Stuttgart, Germany*

2018. This is the author's version of the work. It is posted here for your personal use. Not for redistribution. The definitive Version of Record was published in *Proceedings of Fachpraktikum Interaktive Systeme (FIS'18)*.

le2018palmtouch.pdf or <http://sven-mayer.com/wp-content/uploads/2017/08/mayer2017orientation.pdf>.

Motivate your project by reporting about related work and common goals.

Random example citation [1].

## DATA COLLECTION STUDY

Here report: How and why is the data collection study designed as it is?

### Apparatus

Report about your setup.

### Tasks

Report about the tasks participants has to perform.

### Procedure

Report about the whole procedure.

### Participants

Report about age, gender, and similar demographics.

## RESULTS

Report about your model. No source code!

Report about the validation dataset / validation study.

## DISCUSSION

Disuses why it is still not awesome and how this could be improved. Why this is still awesome? Think about: Nobody has done this before.

## CONCLUSION

Two sentences wrap up what you have done. Than report what you achieved.

### Good Utilization of the Side Bar

**Preparation:** Do not change the margin dimensions and do not flow the margin text to the next page.

**Materials:** The margin box must not intrude or overflow into the header or the footer, or the gutter space between the margin paragraph and the main left column.

**Images & Figures:** Practically anything can be put in the margin if it fits. Use the `\marginparwidth` constant to set the width of the figure, table, minipage, or whatever you are trying to fit in this skinny space.

**Sidebar 1: This is the optional caption**
